

DEMOCRATS AND ECONOMIC GROWTH

This data is compiled by offsetting a President's Administration by a year to account for the fact that the Federal budget for any given fiscal year is drafted and passed in the previous calendar year. For example, 1993's budget was drafted and passed in 1992, during the Bush administration, so that year is ascribed to President Bush, even though President Clinton was in office in 1993.

One exception has been made: 2009's ARRA was drafted and passed by the Obama administration, creating \$114 billion of Federal outlays for 2009. That amount has been subtracted from President Bush II's 2009 budget/deficit total and added to President Obama's.

Since World War II . . .

- Almost twice as many jobs are created per year under Democratic Presidents than Republican Presidents (1.9 million jobs under Democratic Presidents versus 1 million jobs under Republican Presidents.)
- The **deficit** under Republican Presidents has been more than **twice as large** as the under Democratic Presidents. In dollars, Republican Presidents have contributed nearly **\$4 trillion more** to the national debt than Democratic Presidents.
- **GDP growth** has been **44% higher** under Democratic Presidents.
- **Business Investment Growth** has been **165% higher** under Democratic Presidents.
- **Unemployment** has been **18% higher** under Republican Presidents.
- Average increase in **weekly earnings** have been **72% higher** under Democratic Presidents
- Nine of the last ten recessions have occurred under Republican Presidents (<http://www.nber.org/cycles.html>)

JOB GROWTH

Democratic Presidents have helped create **24.4 million more jobs** than Republican Presidents, and on year-to-year basis jobs have grown nearly **twice as fast** under Democratic Presidents as under Republican Presidents.

- Total jobs created under Democratic Presidents: 62,688,000
- Total jobs created under Republican Presidents: 38,256,000
- Average yearly growth in jobs under Democratic Presidents: 1,899,000
- Average yearly growth in jobs under Republican Presidents: 1,063,000

GDP GROWTH

Real Gross Domestic Product growth under Democratic Presidents has been **44% higher** than during Republican Presidents.

- Average real GDP growth per year under Democratic Presidents: 3.75%
- Average real GDP growth per year under Republican Presidents: 2.6%

BUSINESS INVESTMENT GROWTH

Real business investment growth under Democratic Presidents has been **193% higher** than under Republican Presidents.

- Average growth per year under Democratic Presidents: 7.24%
- Average growth per year under Republican Presidents: 2.47%

FEDERAL BUDGET DEFICITS

Federal budget deficits under Republican Presidents collectively are **24% higher** than under Democratic Presidents (as a percentage of GDP, Republican Presidents have been **63% higher** than Democratic Presidents).

- Total Democratic Budget Deficits: \$6273.2 billion
- Total Republican Budget Deficits: \$7807.2 billion
- Democratic Presidents' annual deficits averaged 2.37% of GDP
- Republican Presidents' annual deficits averaged 3.88% of GDP

UNEMPLOYMENT

Unemployment under Republican Presidents has been **18% higher** than under Democratic Presidents.

- Average unemployment per year during Democratic Presidents: 5.27%
- Average unemployment per year during Republican Presidents: 6.24%

GROWTH IN SPENDING

Federal Spending has increased **nearly three times as fast** under Republican Presidents than under Democratic Presidents

- Democratic Presidents' annual spending increased by an average of \$25.3 billion per year
- Republican Presidents' annual spending increased by an average of \$70 billion per year

BALANCE OF TRADE

Trade deficits under Republican Presidents have been **39% higher** than under Democratic Presidents.

- Total trade deficit under Democratic Administrations (in millions): \$4,198,231
- Total trade deficit under Republican Administrations (in millions): \$5,844,269

STOCK MARKET

The Stock Market under Democratic Presidents has grown **200% faster** under Democratic Presidents than under Republican Presidents.

- Average yearly growth in Stock Market returns under Democratic Presidents: +1.92%
- Average yearly growth in Stock Market returns under Republican Presidents: +0.64%

6) Growth in Jobs

Since World War II, Democratic Presidents have created 17.5 million more jobs than Republican Presidents, and jobs have grown almost twice as fast under Democrats than under Republicans

- Total jobs created under Democratic Presidents: 62,688,000
- Total jobs created under Republican Presidents: 38,256,000
- Average yearly growth in jobs under Democratic Presidents: 1,899,000
- Average yearly growth in jobs under Republican Presidents: 1,063,000
- Average yearly percent growth in jobs under Democratic Presidents: 2.59%
- Average yearly percent growth in jobs under Republican Presidents: 1.36%

Growth Rates in the Civilian Labor Force

	Total Jobs Created	Avg growth per year	Years	Average % Growth
Truman	10,452,000	1,233,000	8	3.1%
Eisenhower	5,169,000	646,000	8	1.2
Kennedy	4,549,000	1,516,000	3	2.76
Johnson	11,820,000	2,364,000	5	3.98
Nixon	6,777,000	1,130,000	6	1.58
Ford	6,391,000	3,195,000	2	4.10
Carter	6,476,000	1,619,000	4	1.92
Reagan	17,925,000	2,241,000	8	2.47
Bush	3,395,000	849,000	4	0.78
Clinton	18,516,000	2,315,000	8	2.06
Bush II	-1,401,000	-175,000	8	-0.13
Obama	10,875,000	2,175,000	5	1.68

7) Growth in Pay

Since World War II, the growth rates of average weekly earnings have been 72% higher under Democratic Presidents than to Republican Presidents.

- Average yearly growth in weekly earnings under Democratic Presidents: 0.74%
- Average yearly growth in weekly earnings under Republican Presidents: 0.43%

Excluding the Truman and Eisenhower Administrations, the average annual growth in weekly earnings was +0.44 for Democratic Presidents and -0.25 for Republican Presidents.

Democrats

	% change	yrs	Average
Truman	11.1	5	2.22
Kennedy	8.1	4	2.03
Johnson	4.2	4	1.05
Carter	-9.4	4	-2.35
Clinton	6.7	8	0.84
Obama	1.5	5	0.3

Republicans

	% change	yrs	Average
Eisenhower	22.4	8	2.8
Nixon	0	6	0
Ford	-1.6	2	-0.8
Reagan	-4.0	8	-0.5
Bush	-4.7	4	-1.175
Bush II	3.4	8	0.425

Footnotes

Most data is from various Economic Reports of the President (ERP) or Statistical Abstracts of the U.S. (SA)

Table

1) Source: Congressional Budget Office

2) The total dollar growth for a given year is the difference between that year's total federal outlays, and the previous year's total federal outlays. The percentage growth is found by dividing that year's total dollar growth by the previous year's total federal outlays

3) This data is listed under the first column in Table B-4 ERP(Percent Changes in Real Gross Domestic Product, 1959-2008) under the heading "Gross Domestic Product".

4) For this data set, the percentage growth was found by taking the given year's total non-residential investment figure from Table B-19 ERP, subtracting it from the previous year's figure, and dividing the difference by the previous year's figure. For example, if x represents the total non-residential fixed investment for a given year, then $(1991x - 1990x)/1990x = \%growth$ for 1991.

5) These figures were found by dividing the total number of unemployed citizens (found in table B-36 ERP) over the sum of the employed and unemployed: $(unemployed)/(employed+unemployed)$ for a given year.

6) This table was derived from data from the Bureau of Labor Statistics website, under the title "Total nonfarm payroll employment, seasonally adjusted", and can be found through its Series ID, CES0000000001.

7) The statistics used for this table are under the heading "average weekly earnings, total private", and subheading "percent change from year earlier", and sub-subheading "1982 dollars" from table B-47 ERP.

8) Us Census Bureau, Foreign Trade Division: "US International Trade in Goods and Services, 1992-Present https://www.census.gov/foreign-trade/statistics/historical/exhibit_history.pdf
